Message

from the
Chairman & Managing Director

Dr. S. S. Bansal

MD, DM, DNB, FSCAI, FACC (USA)
Fellow of American College of Cardiology
Chairman & Managing Director
Chairman Cardiology Department
(Trained in Rodenberg Clinic Germany,
Mayo Clinic USA)

Every life is precious, every smile is worth millions. I strongly believe that we have one life to live and we should live this life with determination and passion to give our best in work we chose. When I turn back pages of history of last three decades of my professional life, I see thousands of smiling faces of my patients and their families which is my real achievement. With my 30 years of experience in the healthcare industry and specially in cardiology, I have treated more than lakhs of heart patients and performed more than 50,000 complex cardiac procedures. It is due to the trust and blessings of you all that I could achieve my goal of providing quality healthcare as per international standards to the patients I served.

Being acknowledged as the first cardiologist of Haryana, my journey as a medical professional started in 1994 at Escorts Hospital, Faridabad. The trust and confidence of people whom I treated motivated me to start the first dedicated Cardiac Centre in the basement of Sunflag Hospital in 2002 where I introduced many heart procedures for the first time in the state. Soon after the success of the centre, it encouraged me to come up with a centre of excellence under my leadership not only in the field of cardiology but also speciality and super-speciality areas. In my two decades as head of Metro Hospital, Faridabad, I got opportunity to treat not only pan India patients but also International patients with complex heart disorders. Now I have taken over QRG Central Hospital and renamed it as 'SSB Heart and Multispeciality Hospital.'

My vision is to make "SSB a sought after destination for healthcare by patients from India & Abroad" & mission is to make healthcare services more affordable. SSB Heart & Multispeciality Hospital is carving a name of trust among both domestic and international patients rapidly and within a very short span, we have provided treatment and done many procedures successfully, winning their trust and confidence.

I, as Chairman and Managing Director of SSB Heart & Multispeciality Hospital, is committed to serve our community in the best possible way and constantly endeavour to provide accessible and affordable world-class healthcare services to our patients with unbounded love and unlimited care with compassion.

About the Hospital

SSB Heart & Multispeciality Hospital

OUR VISION

"Excellence in providing world class health care with compassion"

OUR MISSION

Our mission is to provide accessible and affordable world-class integrated healthcare services with state of Art technology and infrastructure for our patients

Dr. Seema Bansal

Executive Director
HOD-Obst & Gynae Deptt.

Hippocrates once said "Wherever the art of Medicine is loved, there is also a love of humanity". Humanity is an act of kindness and compassion towards other beings which comes from self- less act. SSB Heart & Multispeciality Hospital, Faridabad is true believer of humanity and is committed to serve mankind with humanity, love, care and compassion. The Hospital provides world class health care with state of the art infrastructure that is readily accessible, cost effective and meet the needs of society we serve. Established in the year 2007 as QRG Central Hospital and has recently been renamed as "SSB Heart & Multi-Specialty Hospital' after it has been taken over by renowned cardiologist of Delhi-NCR, Dr. S. S. Bansal.

SSB hospital is located in the centre of the city Faridabad and is being run by a team of highly experienced dedicated and qualified doctors having expertise in all specialities and super specialities. We have facilities for angioplasty, heart bypass surgery, brain and spinal surgery, joint replacement, bariatric and laparoscopic surgery, cancer surgery, nephrology, dialysis, neurology, urology surgery, medical oncology and critical care services along with mother and child care.

Here, at SSB Heart & Multispeciality Hospital, we provide advanced, comprehensive, & personalized treatment in all major disciplines. Within short span of time since takeover, we have been able to treat patients with diversified health issues and medical needs, not only from Delhi-NCR region and Haryana but from Pan-India as well as International patients with great satisfaction of the people we served. The Hospital has 24x7 emergency facilities to cater patients of all speciality fields. It gives us immense pleasure and satisfaction to see patient returning back to their home, India or Abroad, with a smile on their face and confidence in their eyes.

DEPARTMENT OF

Cardiology

The department of cardiology at SSB Hospital is an internationally renowned and highly specialised department for diagnosis and treatment of all heart ailments. The department is dynamic, innovative and dedicated to excellence in providing highest quality and advance cardiac care. The centre is providing facilities of primary angioplasty, pacemaker implantation, non-surgical closure of heart valves & 24x7 emergency services for any kind of cardiac emergencies.

We Focus on integrated patient care. Treatment spans from standard non invasive procedures to highly advanced invasive procedures like ICD implantation, chronic total occlusion angioplasty, retrograde angioplasty, Non-surgical valve replacement etc. With the most advanced state of the art cath lab, the department of cardiology is providing services round the clock by a team of highly qualified professionals.

Spectrum of Cardiology procedures:

- Angiography, Angioplasty and stenting of coronaries
- Carotid / Renal / Peripheral and other angioplasty-stenting procedures
- Pacemaker and ICD implantation
- CRT & Combo device implantation for weak hearts
- Mitral, Aortic & Pulmonary Valvuloplasty (opening of stenosed valve)
- Heart Hole Closure without Surgery (ASD, VSD & PDA device closures)
- Non Surgical Valve Surgery (TAVI, TAVR)
- Rotablator angioplasties for calcified hard blocks
- Pressure wire technique for lesion severity assessment (FFR)
- EP & RFA for Cardiac Arrhythmia (heart beat abnormalities)
- Intravascular Ultrasound System for best results of stenting
- Embolisation of brachial & abdominal arteries to control bleeding
- Aortic intervention for catheter based aneurysm & dissection repair
- Thrombolysis for DVT, Arterial Thrombosis, Pulmonary and stuck valve embolism

Diagnostic cardiology : ECG, ECHO with Colour Doppler, TMT & Holter Monitoring

Two 3rd Generation Flat Panel 3D-Cath Lab

3rd Generation 3-D Cath Lab for perfect results of

- Angiography
- Angioplasty
- Stenting & other cardiac procedures
- Coiling of brain aneurysm and Vascular malformations at SSB Hospital

DEPARTMENT OF

Cardiothoracic & Vascular Surgery

Cardiac Surgery department at SSB Hospital, Faridabad, provides complete cardiac surgical services for patients with complex heart problems. Team of renowned cardiac specialists, with more than 30 years of experience perform high risk cardiac procedures with minimal complications and very good success rate. Our team of specialists include cardiovascular surgeons, cardiac anesthetists, intensivists and perfusionist. A dedicated Cardiac OT and CTVS ICU having latest and advanced monitoring equipment and dedicated team of doctors and paramedical staff is available round the clock.

Experienced team of Heart Surgeons & Cardiac Anaesthetist

Spectrum of Cardio-thoracic & Vascular Surgery:

- Beating heart bypass surgery
- Total arterial revascularization
- Minimally invasive cardiac surgeries (keyhole surgeries)
- Complex valve repair and replacement surgeries
- Re-do cardiac surgery
- Aortic aneurysm repair - Bentall procedure
- Pulmonary endarterectomy
- Congenital heart defect surgery
- Vascular Surgery – carotid endarterectomy
- Surgery for peripheral artery disease

Best Heart Lung Machine for Safe Heart Surgeries

DEPARTMENT OF

Neurology

Neurology department at SSB Hospital Faridabad, is a single point destination for the prevention, diagnosis and treatment of Neurological disorders, such as stroke, epilepsy, vertigo, parkinsonism, alzheimer's disease, dementia, dystonia, multiple sclerosis, migraine, sleep disorders, and other neuromuscular conditions.

The department is run by experienced and efficient neurologist and we offer comprehensive care to patients with all kinds of neurological disorders. The department provides a complete range of diagnostic neuro-imaging with medical, surgical and rehabilitation therapy along with full neuro-interventional capabilities. We have an advanced Neurolab with the facility of EEG-EMG-NCV, Video EEG, Portable EEG, SSEP, BERA and VEP.

Pioneer work has been done in the field of stroke management. We have successfully thrombolysed many patients in our hospital. From diagnosis to treatment, we provide compassionate care with comprehensive support to help every patient reach his or her full recovery.

Spectrum of Neurology Department:

- Stroke / Paralysis Clinic
- 24x7 treatment of acute stroke - IV Thrombolysis and Thrombectomy
- Epilepsy Clinic
- Headache & Migraine (Including refractory migraine)
- Dizziness, Vertigo, Tremors, Imbalance
- Memory Loss, Dementia, Parkinsonism
- Multiple Sclerosis, Myasthenia Gravis
- Plasmapheresis
- Botox Treatment and Pain Clinic
- **MRI & CT Scan for accurate diagnosis for Neuro-imaging 24x7**

Portable EEG, EMG, NCV,
Video EEG, SSEP, BERA and VEP
from world best Nicolet Company

DEPARTMENT OF

Neuro-Spine Surgery

Neuro surgery is the super speciality department concerned with the prevention, diagnosis, treatment and rehabilitation of disorders that affect the Brain, Spine and Peripheral Nerves.

Our Neuro-surgical experts offer advanced clinical care with minimally invasive techniques. The department has professional expertise in all disciplines of neurosurgery and is equipped with latest high-end technology. Our Department of neurosciences boasts of a highly skilled team of Neurologist, Neurosurgeon, critical care experts, physiotherapist and specialized nurses who work together to provide the most comprehensive care for our patients.

We are using latest surgical techniques in the treatment such as deep brain stimulation, awoken brain surgery, endoscopic and minimally invasive spine surgery. Patients come to us from all parts of the world seeking the best treatment for their neurological problems and surgeries for complex neuro-surgical diseases.

Spectrum of Neuro-Spine Department:

- Small incision Brain-Spine Surgery for Trauma & Tumor
- Back Pain, Spine Fracture, Disc problems & Cervical Pain
- Trigeminal Neuralgia & Brachial Plexus Injury
- Surgery for Brain Hemorrhage, Aneurysm & Stroke
- Stereotactic & Functional Neurosurgery
- Endovascular neuro-intervention
- Pediatric Neurosurgery - Hydrocephalus, Meningocele, Congenital disorders
- Minimally Invasive (key hole) Brain & Spine Surgery
- Scoliosis Correction Surgery
- Endoscopic spine surgery
- Skull base & endoscopic neurosurgery

Department Highlights

- Neuro Navigation Technology.
- 3D cath lab for cerebral DSA and endovascular procedures.
- High end operative microscope & pneumatic drills
- CUSA & Neuro Endoscopes
- High end c-arms
- Intra cranial pressure monitoring system
- Transcranial Doppler

NEURO NAVIGATION TECHNOLOGY

Very Precise Surgery of BRAIN & SPINE

Neuronavigation system is mostly used in the operations of brain, nerve and spinal cord surgery.

- Brain tumor surgeries
- Cerebral hemorrhage
- AVM (Arteriovenous Malformation) in the surgery of cerebrovascular diseases
- In cases of Parkinson's or similar diseases with tremor, in surgeries requiring battery insertion
- Spine surgeries and determination of the direction of the screws placed in the spine

Advance Microscope for Brain & Spine Surgery

Our Neurosurgeon uses **CUSA**

(Cavitron Ultrasonic Surgical Aspirator)

to cut out and aspirate brain and spine tumours without affecting healthy tissues of brain and spinal cord

DEPARTMENT OF

Critical Care Medicine

We have an advance, fully equipped Critical Care Medicine department, which offers state of art facilities with highly experienced doctors for ICU and emergency care. All beds are equipped with international equipment allowing close monitoring of patients with cutting edge technology to provide advanced life support/ resuscitation. We have round the clock specialized critical care specialists and emergency experts who can manage complex medical and surgical illnesses.

The ICU has a nurse to patient ratio of 1:1 i.e. one nurse for each patient. We at SSB hospital, are offering the maximum possibilities of survival of patient who are acutely & critically ill. A lot of emphasis has been placed on areas like staff training, standardized care & dedicated team of doctors & paramedical staff available 24x7. At SSB hospital, we have different ICUs including Medical & Surgical ICU, CCU, CTVS, PICU & NICU.

Facilities:

- Nurse to patient ratio of 1:1
- All equipments are on UPS system for uninterrupted working
- Portable diagnostics available such as X-ray, Ultrasound, Echo-cardiography & Peripheral Doppler.
- Bedside arterial pressure monitoring on all ICU beds.
- IV medicines & fluids are infused through Infusion Pumps for controlled dose monitoring.
- Bedside procedures being performed such as airway management, Invasive & Non-invasive ventilatory support, bronchoscopy, endoscopy, dialysis, tracheostomy, paracentesis, thoracentesis, ICD tube placement etc.

DEPARTMENT OF

Pulmonology, Allergy & Sleep Medicine

Department expertise in treatment of:

- Bronchial Asthma
- Tuberculosis including Multi-Drug resistant cases
- Pneumonia
- Interstitial Lung Disease (ILD)
- Auto Immune diseases
- Different type of allergies
- Chronic Bronchitis / COPD / Emphysema
- Sleep Related Disorders (Sleep Medicine)
- Lung Cancer
- Pleural Diseases (Pleural effusion, Pneumothorax)
- Allergen Immunotherapy

Other facilities available:

- PFT Lab (PFT, FENO, 6MWT, DLCO)
- Video Assisted Bronchoscopy
- Allergy Clinic
- Interventional Pulmonology (Bronchoscopy, EBUS, Thoracoscopy, Tracheal Stenting, Foreign body removal)
- Hydrogen Breath Test Analyzer

Bronchoscopy system for Respiratory Management

EBUS for Safe Lung and Lymph Node Biopsy

DLCO Machine for precise Lung function

exclusive
SERVICES

DLCO (Diffusing Capacity of the Lungs for Carbon Monoxide) is a measurement to assess the lungs' ability to transfer gas from inspired air to the bloodstream. It helps to understand how well your lungs are working. It is required for patients with breathlessness to rule out lung parenchymal disease.

FENO Machine

exclusive
SERVICES

A FeNO test can help your health care provider confirm an asthma diagnosis in adults and children ages 5 and older.

FeNO devices measure fractional exhaled nitric oxide in the breath of patients. Nitric oxide is a biomarker for asthma which provides an indication of the level of inflammation in the lungs.

DEPARTMENT OF

Gastroenterology

The Department of Gastroenterology & Hepatology at SSB Hospital delivers quality health care services to patients with diseases of the Liver, Pancreato-biliary and Gastrointestinal systems. Our Centre of Excellence provides world-class technological interventions, such as the high-end OLYMPUS Endoscope (upper and lower GI) and ERCP (Endoscopic Retrograde Cholangio-pancreatography) system. By combining exceptional care and state-of-the-art treatment, our expert team is backed by advance intensive care facilities 24x7.

- **Full range of procedures available :**
- Diagnostic and Therapeutic Upper & Lower GI Endoscopy
- Foreign body removal
- PEG -Percutaneous endoscopic gastrostomy
- ERCP -Endoscopic retrograde cholangio-pancreatography
- Single Balloon Enteroscopy
- Argon plasma coagulation
- Capsule Endoscopy
- Fibro scan & Banding (EUL)
- Sclerotherapy & GLUE therapy
- Stenting & Polypectomy
- Hem clipper
- Hydrogen Breath Test
- Abscess Drainage
- Liver Biopsy

Fibroscan Machine for Fatty Liver, Cirrhosis, Early detection of liver disease and Liver Cancer

Hydrogen Breath Test Analyzer

Hydrogen Breath Test Analyzer measures hydrogen gas levels (H₂) in the breath you exhale. It's used to help diagnose common digestive problems, including SIBO, IBS and lactose intolerance. Different versions of the test measure your digestion of different sugars.

OLYMPUS ENDOSCOPE 190 Series

Argon Plasma Coagulation (APC) to stop stomach & Intestine Bleeding

exclusive
SERVICES

APC is a medical procedure that uses argon gas to cause blood to clot and to form scar at bleeding point during a colonoscopy or an upper endoscopy to control bleeding from certain lesions in the gastrointestinal tract.

DEPARTMENT OF

Nephrology & Dialysis

The Department of Nephrology offers diagnosis, treatment and management for various kidney disorders such as renal tract infection, acute and chronic kidney disease, end-stage kidney disease, kidney damage due to high blood pressure, diabetes and other kidney ailments, blood in urine (Hematuria), protein in urine (Proteinuria), hereditary renal disorders. We have installed the best dialysis centre in Faridabad, being supported by ARCS-global, LLC, USA to maintain and provide highest quality dialysis services at an affordable price.

Dialysis Services:

- Modern Haemodialysis Machines
- Dedicated double RO water plant exclusively for dialysis
- High-End Monitoring Equipment
- CRRT Unit
- Separate machine for seropositive patients

The scope of services includes the following:

- Haemodialysis
- Peritoneal Dialysis
- Continuous Ambulatory Peritoneal Dialysis (CAPD)
- Sustained low-efficiency dialysis (SLED)
- AV FISTULA
- AV GRAFTS
- Permacath Insertion (Tunneled catheters)
- Untunneled Dialysis Catheters
- Renal Angiography & Angioplasty
- Critical Care Nephrology
- Plasmapheresis
- Kidney Biopsy
- Kidney friendly diet consultation

State of art 10-Dialysis Machine & CRRT (Continuous Renal Replacement Therapy)

World's Best Machine - Fresenius

DEPARTMENT OF

Urology

At SSB Hospital we have a well equipped department of urology with the latest technology and team of highly experienced experts. We offer comprehensive treatment to all medical & surgical diseases of urinary tract system. Besides that, laparoscopic as well as open surgeries are being performed for all urological diseases. We excel at treatment of kidney stone by holmium laser for high success rate, minimum complications and fast recovery.

Urology Services:

- All advanced Endo-urology & Minimally Invasive surgeries
- Comprehensive urological care provided including high risk prostate surgery with Bipolar TURP
- Stone treatment with RIRS, Minipcos, URS, CLT etc.
- Laparoscopic surgery for tumors and reconstruction
- All types of stricture urethra management
- Female urological problems with surgery for stress incontinence & VVF
- Paediatric Urology
- Urinary tract infection and all genitourinary trauma.
- AV Fistula

HOLMIUM LASER

for stone removal without surgery

DEPARTMENT OF

Orthopaedics, Joint Replacement & Sports Medicine

The department of orthopaedics & Joint Replacement is at the forefront in offering the latest in orthopaedic treatments & surgical techniques.

The most advanced '3D-Technique' using pin less computer navigation for accurate joint replacement surgeries is available. State of art infrastructure & a team of highly experienced orthopaedic surgeons are supported by critical care department round the clock.

In order to provide relief from joint pain due to age related arthritis and sports injuries, the minimally invasive joint replacement surgeries are performed routinely with very good results and improved quality of life.

Facilities Available:

- Minimally Invasive customized Total Knee Replacement
- Computer Navigated Hip & Knee replacement
- Total Hip Replacement
- Partial knee replacement with early rehabilitation
- Revision Knee & Hip Replacement Surgery
- Total Shoulder Replacement Surgery
- Total Elbow Replacement Surgery
- Key hole surgery for Knee, Shoulder, Elbow & Ankle
- Advanced Fracture & Polytrauma Management
- Advanced arthroscopy of all joints
- Corrective Surgery of Malunion & Nonunion Fracture
- Management & rehabilitation of sports injury
- Deformity correction
- Limb lengthening

Expert treatment in:

- Fracture & Trauma
- Sports injuries
- Malformation of bones
- Arthritis and Joint Pain
- Gout
- Frozen Shoulder
- Bone Tumors
- Congenital deformity
- Osteoporosis
- Osteomalacia
- Carpal Tunnel syndrome
- Plantar fasciitis

A step towards smarter future

DEPARTMENT OF

General, Laparoscopic & Laser Surgery

This Department offers all variety of General and minimally invasive surgeries. The Department is equipped with state-of-the-art facilities like modular OTs, high definition Laparoscopic system, medical monitors (with ICG enhance mode), vessel sealing devices like Harmonic Enseal & Ligasure. Department also offers Single Incision (Scarless) Laparoscopy Surgery, Video assisted thoracoscopic surgery (VATS), Laser treatment for Varicose Veins, Piles, Pilonidal sinus, fistula etc.

Minimally Invasive surgeries help in early recovery of patients and resume their daily activities sooner. Laparoscopic surgery causes minimal pain, short hospital stay, reduces risk of infection and has excellent cosmetic results.

Surgical Facilities available:

- All type of General Surgeries
- Lap. Cholecystectomy, Appendectomy & Lap CBD Surgery
- Lap. Inguinal and Ventral Hernia repair
- Lap. Nissen fundoplication for Hiatus Hernia
- Lap. Heller's cardiomyotomy for achalasia cardia
- Lap. Splenectomy & Hemicolectomy
- Bariatric & Metabolic Surgery (Sleeve gastrectomy)
- Lap. Assisted APR/LAR/ULAR for cancer
- Lap Cystogastrostomy
- Stapled Haemorrhoidopexy for piles
- Cancer surgeries for Oesophagus, Stomach, Pancreas, Colorectal, and Breast
- Thyroid surgeries

Laser Surgery for:

- Laser Surgery & Flap surgery for Pilonidal Sinus
- Laser Surgery for Varicose Veins
- Laser Fissure Surgery
- Laser Fistula Treatment
- Piles Treatment by Laser and Sclerotherapy
- Circumcision Surgery

Modular Operation Theatre

Laser Machine

for Fistula, Pilonidal sinus, Piles, Fissure & Varicose Vein

Advance Lap. System

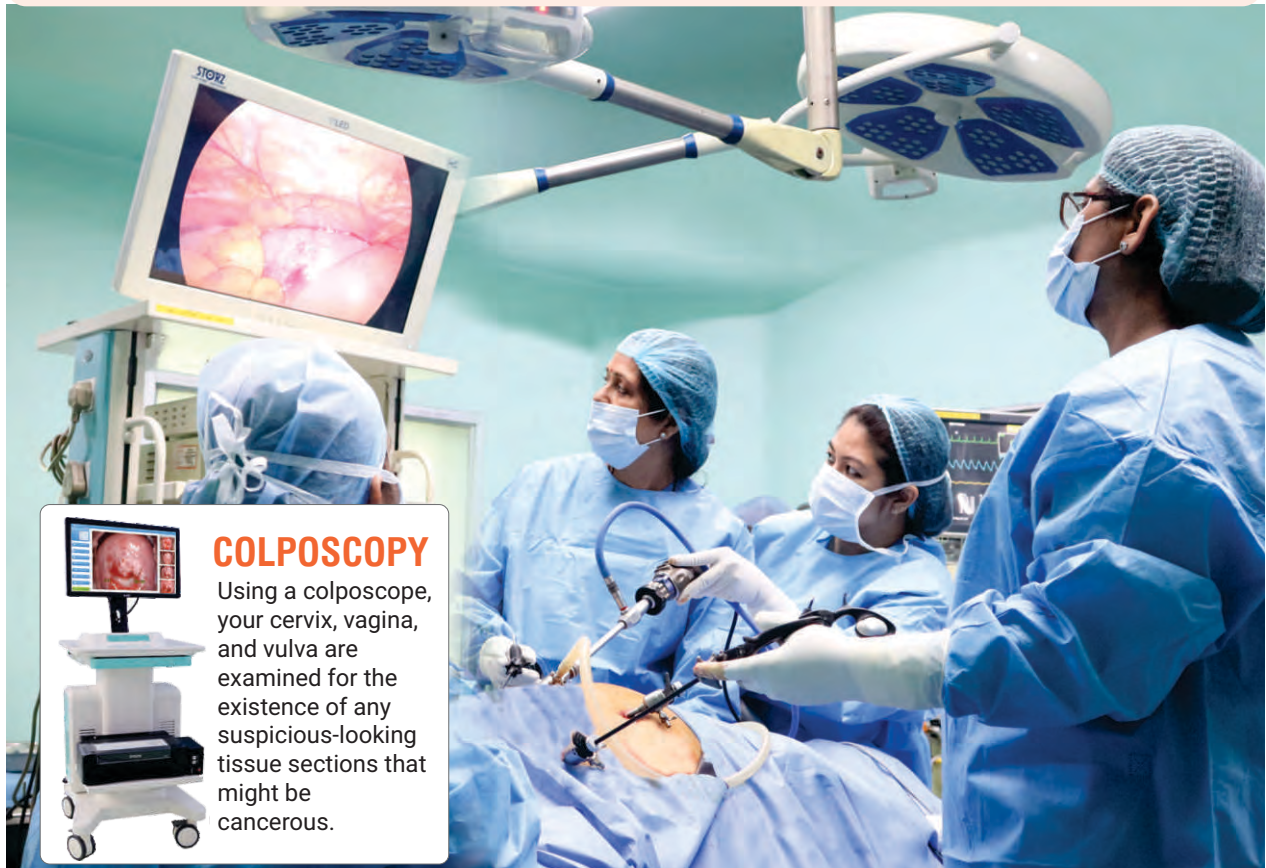

for Gall Bladder, Appendix, Hernia, PCNL, RIRS, Uterus & Ovaries Surgery

DEPARTMENT OF

Obstetrics & Gynaecology

SSB Hospital, Faridabad has an ideal healthcare environment for mother & child with its experienced team of Obstetricians, Gynaecologists & Neonatologists along with dedicated paramedics. We address the specific needs of pregnancy, childbirth and the postpartum period. The Labour Room and NICU provide the latest treatments, diagnostics, and imaging technologies, all in the comfort and convenience of a single location.

COLPOSCOPY

Using a colposcope, your cervix, vagina, and vulva are examined for the existence of any suspicious-looking tissue sections that might be cancerous.

Complete Pregnancy Care:

- State of Art Labour Room (LDR)
- Antenatal & Postnatal Checkup
- Painless Labour & Delivery
- High Risk Pregnancy Care & Delivery
- Normal Delivery, Instrument Delivery & C-section available round the clock
- MTP
- Laparoscopic Treatment for Ectopic pregnancy
- Preconceptional and Infertility Counselling
- Family Planning Counselling
- 24x7 emergency service for high risk delivery
- Management of Medical & Surgical disorder in pregnancy

Gynaecology Facilities:

- Modular Operation Theatres
- Laparoscopic and Hysteroscopic Surgeries
- Well Women Check-up & Post Menopausal Clinic
- Cancer Screening and Treatment
- Treatment of PCOD and Hormone Related Disorders
- Laparoscopic tubal-ligation
- Treatment of ovarian cyst
- Treatment of Fibroid
- Laparoscopic removal of uterus
- Treatment of Menstrual abnormality

DEPARTMENT OF

Paediatrics & Neonatology

Our paediatrics department has an excellent infrastructure with latest equipments for the best care of newborn babies, children and adolescents. Our state of art neonatal intensive care unit (NICU) provides excellent care to critically ill children. Our paediatrics team is specialized in treating neonatal problems like premature birth, respiratory distress, septicemia, jaundice. We also provide paediatrics critical care, immunization and treatment for adolescent diseases.

Paediatric & Neonatal Facilities:

- State of art NICU
- High end Ventilator with Pulmonary graphics for Newborn Babies
- 24x7 Neonatal & Paediatrics Emergencies
- Paediatric Non-invasive & Invasive Ventilation
- Open Care Warmer
- Highly effective phototherapy for Jaundice in newborns
- Critical Care facilities and monitoring equipments
- Paediatric Surgery
- Immunization & Vaccination (Painful and Painless)
- Child growth & development disorders
- Adolescent health issues

DEPARTMENT OF

Internal Medicine and Diabetology

Department of Internal medicine at SSB hospital has a team of experienced physicians to deal with a wide range of infectious diseases and metabolic diseases. They are expert in the management of Fever, Dengue, Malaria, Jaundice, Typhoid, Diabetes, High blood pressure, Thyroid diseases, High cholesterol etc. Special care to diabetic patients is given by our professional diabetes educator and dietician.

Expert in:

- Diabetes Treatment & Education
- Thyroid Diseases
- Infectious Disease Treatment
- Typhoid, Malaria, Dengue Fever
- Jaundice Treatment
- Irritable Bowel Syndrome (IBS) Treatment
- Cough & Covid-19 Treatment
- High Blood Pressure
- Arthritis Management

DEPARTMENT OF

Medical Oncology

Equipped with state-of-the-art infrastructure and imaging, the medical oncology department at SSB Hospital, Faridabad offers comprehensive cancer care, from screening and diagnosis to pain management and palliative care. The department extends expert guidance and follows a systemic approach to cancer diagnosis and treatment.

Through an array of advanced technology and therapeutic interventions, our team of experienced medical professionals provide world-class treatment for a broad range of tumors and malignancies. We deliver medical therapies and rehabilitation treatments for tumors in the head and neck, gastrointestinal area, genitourinary area, thoracic, breast, brain and spine to list a few. We also offer oncological care and treatment for hematological malignancies such as leukemia (acute and chronic), lymphomas (hodgkins and non hodgkins), myelodysplastic syndrome, myeloproliferative neoplasm and multiple myeloma.

Services Available:

- Cancer Screening: Colon cancer, Cervical cancer, Prostate cancer & Breast cancer.
- Cancer Diagnosis
- Cancer Preventive Vaccination
- Genetic counselling for hereditary tumors
- Cancer Therapy (Chemotherapy, Targeted therapy, Hormonal therapy, and Immunotherapy)
- Bone marrow aspiration and biopsy
- Palliative care of patients.
- Pain management

DEPARTMENT OF

Plastic Surgery &

The department of Dermatology, Cosmetology & Plastic Surgery offers expertise in performing complex cases of cosmetic, microvascular, reconstructive, maxillofacial surgeries and burns management.

Specializes in :

- Bedsore, Microvascular repair, Tendon, Nerve & Muscle Repair, Facial Fractures, Skin Grafting, Flaps for various defects
- Burn Management & Burn Deformity
- Reconstruction surgery
- Hand Surgeries
- Scar revision & Tattoo Removal
- Fat Injection
- Liposuction / Gynaecomastia
- Hymenoplasty, Vaginoplasty
- Breast Augmentation/Reduction
- Facelift, Tummy Tuck & Body Contouring
- Botox & Fillers
- Baggy eye lids & Nose Job (Rhinoplasty)
- Drooping eyelids

**Diode
Laser
for Hair
Removal**

**Co2 Laser
Machine
for Facial
Laser**

DEPARTMENT OF

Dermatology, Cosmetology

Expertise in:

- All Dermatological and Venereological disorders
- Leprosy, Scabies
- Psoriasis
- Dermatological emergencies
- Allergic patch testing
- Radio frequency and Electro cautery
- Chemical Peeling
- Derma roller/Derma Pen
- Alopecia & PRP Technique
- Skin Biopsy, Botox & Fillers
- Hair transplant & Thread Lift
- Vitiligo surgery (Punch grafting and Suction blister technique)
- Management of Pigmentations, Hirsutism, Acne Scars etc.
- Equipments : Whole body phototherapy, Dermapeel gold, High frequency radio surgery

**Pico laser tattoo removal machine
with acne scar and
pigmentation treatment**

DEPARTMENT OF

Ophthalmology

Our Department of ophthalmology is available to take care of your eyes round the clock. We focus on comprehensive eye check-up, preventive treatment and specialized eye care services, including advanced equipments for diagnosis and management of all eye diseases. Our centre has expert specialists who provide consultation and end-to-end treatment for an array of eye ailments and cater to all the needs of our patients under one roof including cataract surgery without any injection in the eye.

OCT (Optical Coherence Tomography) For Retina and Glucoma

This machine is used for the meticulous examination of the RETINA, detecting issues such as macular degeneration, diabetic retinopathy with unparalleled accuracy. It is a game-changer in GLAUCOMA management revealing early signs for timely intervention.

Services Available:

- Cataract operation without any injection in eye from a very tiny 2.2mm cut.
- Premium lens implantation and other premium cataract surgeries
- Anterior segment surgeries, Glaucoma diagnosis and management
- Retinal diseases screening, Intravitreal injections & Ocular trauma
- Ocular inflammation and uveitis, Eye infective diseases & Myopia control programme
- Computerised eye testing & visual-field charting

CT-800 Computer
Tonometer

Computerised
lensometer

Phacoemulsification System
from Alcon USA

Leica Microscope
from Germany

A-Scan

This advanced technology ensures precise calculations for intraocular (eye) lens power to be used for cataract surgery of each and every patient.

DEPARTMENT OF

Ear, Nose & Throat (ENT)

The hospital has a team of ENT specialists with excellent competence to treat disorders of the ear, nose, throat and neck region.

ENT & HEAD NECK SURGERY
Available round the clock

Treatment includes:

- Endoscopic nasal and sinus surgery
- Microsurgery for ear and larynx
- Surgeries of middle ear
- Cochlear implant surgeries
- Mastoid surgery
- Video Laryngoscopy
- Nasal endoscopy
- Foreign body removal
- Hearing aid and speech rehabilitation.
- Early detection of cancer
- Oral and Nose Cancer Surgeries
- Surgery of Tonsillitis, Adenoids, Nasal polyps
- Treatment of vertigo
- Pharyngitis & Laryngitis
- Pure tone audiometry
- Impedance audiometry
- Brainstem Evoked Response Audiometry (BERA)

DEPARTMENT OF

Dentistry

The dental department of SSB Hospital is par excellence. It has advanced treatment techniques for the perfect smile.

Advanced Dentistry

- Implants, Metal Free Crown and Bridges and Implant supported full Dentures
- Root Canal Treatment (Single visit RCT)
- Fixed and Flexible dentures
- Full mouth rehabilitation
- Oral Cancer patient rehabilitation
- Post trauma reconstructive surgery for dental alignments.

Cosmetic Dentistry

- Smile Designing
- Veneers and Laminates (For Tooth Stains & Discolorations)
- Braces Treatment - Invisalign (Invisible Braces) and ceramic braces
- Teeth Whitening (Bleaching)
- Dental Jewels

General Dentistry

- Checkup and Digital X-ray
- Pyorrhoea treatment (Bleeding gums, bad breath, loss of teeth)
- Kids dentistry
- Coloured tooth Filling
- Painless wisdom tooth extraction

DEPARTMENT OF

Radiology

Accuracy in diagnostics and imaging is critical to the doctor's treatment, so we at SSB Hospital Faridabad, provide the best radiology facilities with a team of highly experienced experts. The department of imaging and radiology is providing state-of-the-art diagnostic services 24x7.

- MRI
- CT Scan
- Digital X-Ray
- 4D Ultra Sonography

**1st Fully Digital
Whole Body
& Cardiac
MRI**
in Faridabad

3rd Generation
500 equivalent slice

- High-Resolution Imaging
- Fat Analysis & Calculation

DEPARTMENT OF

Laboratory & Blood Bank

The accuracy of modern medicine depends on support of a sound diagnostic backup facility. The diagnostic laboratory of SSB Hospital is equipped with the latest equipments for its Pathology, Cytology, Microbiology & Biochemistry Divisions.

The objective is to provide consistent, reliable and timely reports to facilitate optimum patient care. For the convenience of the patients, there is a common collection centre for all laboratory samples in the hospital. The lab services are available round the clock. The laboratory services have also provided facility for executive health checks under the overall program of Preventive Health Check.

Lab services include:

- Clinical Pathology
- Cytopathology & Endocrinology
- Cytochemistry & Flowcytometry
- Hematology & Coagulation
- Histopathology & Immuno-histochemistry
- Microbiology & Serology

DEPARTMENT OF

Preventive Health Checkup

Our Preventive Health Checkup covers Coronary Calcium Screening to rule out heart disease with Certainty. Many of the lifestyle diseases progress silently without any symptoms. Health problems like heart disease, high blood pressure, high cholesterol, cancer, diabetes, thyroid related problems, kidney disorder may not have symptoms in the early stages, yet have life-threatening consequences. Recognizing the importance of preventive health care, we have created a dedicated Preventive Health Clinic to focus on the detection of potential ailments with health packages for all age groups.

Preventive Healthcare Procedures:

- A range of health screening packages customised to address different risk profile
- Packages vary according to age, gender and risk factors
- Each package offers a carefully selected panel of tests that helps in identifying predisposing risk factors and silent diseases
- Physical examination by a consultant physician, surgical consultation for men and gynaecological consultation for women by an experienced team of doctors
- Technologically advanced testing equipment and trained technicians for reliable reports
- Effective implementation of follow up services

DEPARTMENT OF

Physiotherapy

The Department of Physiotherapy offers physical rehabilitation for the treatment and management of disease and disability to improve quality of life. The physiotherapy services are provided in the intensive care, In Patient Department (IPD) and Out Patient Department (OPD).

Services :

- Cardiopulmonary Rehabilitation
- Joint Replacement Rehabilitation
- Sports Injury Rehabilitation
- Neurological & Spinal Rehabilitation
- Musculoskeletal Rehabilitation
- Paediatric Rehabilitation
- Geriatric Rehabilitation
- Gynaecology & Obstetric Rehabilitation

Methods :-

Electrotherapy : IFT, TENS, Ultrasonic therapy, Laser, Muscle Stimulator, CPM, Lymphopress

Exercise therapy :

Manual Mobilization & Manipulation, Pilates, Mat Exercise, Functional Training, Gait Training, Balance and Coordination Exercise, Antenatal & Post Natal Exercises, Post Operative Rehabilitation (THR, TKR, ACL, PCL or Arthroscopic Surgery), K-taping

TPA / Insurance / Corporate Desk

SSB is pledged to offer credit facility to the patients from Corporates, PSU's and TPA with whom we have tie ups. To initiate the process of credit, one can contact at the TPA Help desk and submit the patient's valid identity proof and other documents. For the convenience of patients, the hospital has established a help desk on the ground floor by the name of TPA/ Insurance desk. It is mandatory to get approval for cashless facility from TPA or the respective corporate or PSU before patient gets admitted for planned procedures.

However, if the patient gets admitted in emergency for life saving treatment then approval for cashless facility must be attained before the discharge. SSB Hospital will completely help in the process of cashless treatment by technical TPA staff who can guide the patient about the formalities for the respective creditor.

Heart valve changed without surgery in Faridabad's SSB Hospital

Conventionally, when the aortic valve of the heart becomes severely narrow, it requires surgical replacement. The aortic valve is the one that prevents the backward flow of blood from the aorta (the largest artery that supplies blood to all parts of the body). That narrows the aortic valve can be replaced by a transcatheter technique from a tiny puncture in the groin artery. This technique doesn't involve any surgical incision on the body.

A 59-year-old female was recently admitted to SSB Hospital, Faridabad, for this procedure. She was suffering from severe aortic stenosis (narrowing of the valve) causing severe obstruction of blood flow from the heart to the aorta. She was having breathlessness and chest pain. In addition to severe aortic stenosis, she was also found to have a critical leakage in her right coronary artery. Both problems could lead to around 50% of patients and, at this age, are usually handled by cutting open the chest and heart and doing valve replacement and bypass surgery. Our patient refused to undergo such a major double heart surgery.

However, she could be treated by the non-surgical transcatheter aortic valve replacement (TAVI) transcatheter aortic valve replacement, angioplasty and stenting of the right coronary artery. Both the procedures were done successfully within two hours, in the same sitting, in a minimally invasive manner. The patient was discharged the next day. Another important thing is that the

value placed through the catheter was made in India. The valve can be very precisely placed across the aortic valve in a cath lab. The results are as good as the best in the world.

At present, the only way to treat aortic stenosis is by replacing the valve. This procedure costs around ₹5 lakh, which is around five times higher than the surgical valve replacement.

The non-surgical option, called TAVI, is life-saving for those who are unable for surgery and also for those who don't want surgery despite a serious valve problem and are willing to spend more money.

The author of this article is Dr. SS Bansal, MD, DM, DMR, FACC, FISCAC, senior interventional cardiologist, CMD, SSB Heart Hospital, Faridabad.

Rare case of heart attack with septal rupture treated at SSB Hospital, Faridabad

A hole in the septum that divides the left and right chambers of the heart, occurring due to a heart attack, is a rare but life-threatening condition. If not operated on, 80% of the patients die. Even in the best hands, surgery to close such holes in the heart can save only 50% of patients.

The complication related to heart holes due to the patient comes to the hospital after 24 hours after the heart attack. Because of the facilities of emergency angioplasty, these holes in the heart have become very rare (0.3%) now. Though they are a lethal complication of a heart attack, a 59-year-old female with hypertensive women suffered a major heart attack called acute anterior wall myocardial infarction (AMI). The subsequent coronary angiography and angioplasty with stenting to LAD, a hospital in Faridabad. Her condition continued to deteriorate even after the procedure. On arrival at our hospital, her blood pressure was very low. A 2D echo revealed a ventricular septal rupture with poor heart function. The patient's relatives consulted Dr. SS Bansal, a

senior interventional cardiologist, for her further management. She was shifted to SSB Heart and Multispecialty Hospital, Faridabad, on June 22, with a big hole in the septum of her heart.

This happened due to severe damage to the septum as a result of the heart attack. The case was discussed with the chief cardiac surgeon, Dr. (Brig) SS Sidhu. The patient was stabilised by using an intra-aortic balloon pump (IABP). As she had deteriorating kidney functions, she was taken for emergency surgery.

The patient underwent a patch repair of the large hole in the septum and a bypass surgery with balloon support by Dr. Sidhu, Dr. Nitish Agrawal, cardiac anesthesiologist, Dr. Prashant Gupta and Dr. Neelima Agrawal.

Post-operatively, there was a gradual improvement in her blood pressure. The patient was taken off the ventilator and balloon pump on the third postoperative day, and she recovered very fast after this emergency surgery.

In most cases of post-MI VSD (ventricular septal defect), there is an immediate decline in blood pressure, which usually leads to cardiogenic shock and death. After a heart attack, VSD is a surgical emergency needing immediate surgical or device closure. This case signifies the role of team efforts, meticulous surgery and round-the-clock high-end critical care.

"Only a dedicated and motivated cardiac and cardiothoracic team can save such high-risk patients," says Dr. SS Bansal.

'जटिल सीटीओ एजियोप्लास्टी स्टेटिंग से बाईपास सर्जरी से बचाव संभव'

फरीदाबाद, 6 अप्रैल (सूरी): चिकित्सा क्षेत्र में अग्रणी एमएफएओ अस्पताल के डॉक्टरों ने कामप्लेक्स एजियोप्लास्टी के जटिल मरीज को नया जीवन दिया है। मरीज को हालत इतने गंभीर थी कि उसे बाईपास सर्जरी की जरूरत थी, परंतु अस्पताल के डॉक्टरों की कुशलता के चलते उसकी सीटीओ एजियोप्लास्टी की गई, जिससे उसे नया जीवन मिला। अस्पताल के चिकित्सक एवं बृद्ध हृदय रोग विशेषज्ञ डा. एस.एस. बंसल ने बताया कि 62 वर्षीय मंश सिंह लम्बे अरसे से छाती में दर्द तथा सांस फूलने की शिकायत से पीड़ित थे। उन्हें एसएसबी अस्पताल से एमबीबीएस के दर्द की शिकायत को वहाँ से भर्ती कराया गया। मरीज की एजियोप्लास्टी की गई, जिसमें उनके हृदय की तीन धमनियों में से दो धमनियों में तुरंत ब्लास्म थे जो बहुत खतरा था।

कैथिपय चूक थे। मरीज को हृदय की तीसरी आर्टरी में फ्लेप से स्टेंट डाला हुआ था। डा. बंसल ने बताया कि हृदय में कठिनाई व्यक्ति के कारण मरीज को हृदय के गैर करने को क्षमता बहुत घीरी हो गयी थी, जो केवल 30 प्रतिशत रह गई थी, जहाँ हृदय में इस तरह के जटिल ब्लॉक होते हैं, तो मरीजों को अक्सर बाईपास सर्जरी के लिए कहा जाता है। ऐसे मरीजों में एजियोप्लास्टी बेहद मुश्किल है और इसमें रीजल्ट डॉक्टर को अनुभवी होना बहुत महत्वपूर्ण है। ऐसे डॉक्टर व्यक्ति के लिए विशिष्ट के अनुभवी से अनुभवी डॉक्टर भी फेमिलर आर्टरी से हो एजियोप्लास्टी करते हैं एमएस केस में मरीज को फेमिलर आर्टरी पुरी तरह से ब्लॉक थी, जिसकी वजह से फेमिलर आर्टरी से एजियोप्लास्टी करनी पड़ी थी।

107-year-old woman saved from massive heart attack at SSB Hospital Faridabad

A former armed forces personnel's companion was brought to the emergency ward of SSB Heart and Multispecialty Hospital Faridabad, on January 21, with chest pain and was admitted under Dr. SS Bansal and his team. She had suffered a major heart attack, and was immediately taken for angiography procedure in the cath lab on the same day. After the angiography, she was found to have a 90% blockage in proximal LAD artery with a large distal lesion at the site of the blockage, causing the heart attack," shared Dr. Bansal.

"With consent from the family, the artery was opened with balloon and under observation in the coronary care unit for one day. She remained stable and was discharged in a healthy condition the next day," added Dr. SS Bansal, chairman and managing director of the hospital.

This case goes on to prove that if timely action is taken by recognizing the heart attack early, and expert intervention taken up by opening the blocked artery in the heart by angioplasty and stenting, even extremely old patients can be saved.

"It is a big achievement for the hospital. Technology and expertise in non-surgical heart attack can be successfully treated by non-surgical method of angioplasty and stenting in good centres of the world. No age is a barrier to emergency treatment in case of heart attack," said Dr. Bansal.

SSB Heart and Multispecialty Hospital: Excelling in heart disease management

SSB Heart and Multispecialty Hospital, Faridabad, is rapidly emerging as a preferred centre for advanced, comprehensive and personalised healthcare for patients across the country as well as abroad.

Founded by Dr. SS Bansal, a renowned interventional cardiologist with more than 30 years of experience in heart disease management, the 220-bedded hospital located in the heart of the city. It provides world-class healthcare services with state-of-the-art infrastructure that is readily accessible, cost-effective and meets the needs of society. With its dedicated team of specialists and super-specialists, SSB Heart and Multispecialty Hospital is the first medical facility in Delhi-NCR to have a world-class rural locality where patients can avail radial angiography and angioplasty in the presence of one attending on day-care basis, thus saving significant expenditure. In a short span of two years, the hospital has successfully performed more than 5,000 heart procedures, including complex angioplasties (stenting) pacemaker, heart-hole closure without surgery, etc. More than 5,000 laparoscopic and laser surgeries and around 400 joint replacements have also been accomplished successfully. Dr. (Brig) SS Sidhu, chief cardiac surgeon with more than 30 years of experience in cardiac surgeries has performed more than 500 heart surgeries like open-heart surgeries and valve replacement surgeries in the hospital.

Patient with repeated paralysis problem treated non-surgically at SSB Hospital

SSB Hospital recently treated a 40-year-old patient - with a medical condition of repeated paralysis - non-surgically. A 40-year-old male came to the OPD with complaints of repeated paralysis (repeated weakness on one side of body) in last three years. Before coming to SSB, he had treated many hospitals, neurologists had done many multiple scans (MRI, CT brain, 24 hours Holter monitoring, 2D echo, etc.). The cause of his paralysis was still not clear after all these investigations. This is called as cryptogenic stroke," says Dr. SS Bansal, chairman and managing director of SSB Heart and Multispecialty Hospital, Faridabad.
